

DON'T SETTLE FOR

"GOOD ENOUGH" INTERNET

TODAY'S DIGITAL WORLD DEMANDS MORE

Is Your Connectivity Up to Par? Use This Checklist to Find Out!

- Connectivity downtime costs me business, especially with card transactions.
- Applications and websites take too long to load, creating frustration.
- Uploading large files takes what feels like forever.
- Severe storms consistently knock out my connectivity.
- My data backups are extremely slow or delayed, especially during work hours.
- Video streams pause or are choppy.
- My internet upload speeds are extremely slow.
- Cloud applications don't perform optimally.
- My current internet provider is slow to respond when I have an issue.

- Meetings with remote employees are often interrupted, choppy, or simply drop.
- Employee productivity is down due to long wait times.
- My connectivity goes out often.
- Trying to get a hold of my provider's customer service is a big headache.
- Our CRM system experiences lag, causing frustration for employees and customers.
- Processing digital transactions is slow, and customers leave before buying.
- Slow connectivity has disrupted our inventory management systems.
- Remote employees have a hard time accessing company resources due to lag.
- Long buffering times make it impossible to use video tools for the office.
